MEASURLINK 8 BUNDLE

MEASURLINK SPC SOFTWARE, DATA MANAGEMENT HARDWARE
AND SMALL TOOL PROMOTION

Effective October 15, 2015 through February 25, 2016

MEASURLINK BUNDLE PROMOTION

Mitutoyo America Corporation announces the latest version of MeasurLink software.

Based on user feedback, MeasurLink 8.0 builds on the functionality of the previous version of the best-selling software, allowing an operator to collect data from most measuring instruments, and analyze, monitor and manage the results to monitor the production process in real-time.

The latest version of this data management software re-introduces the Gage Management module. The Gage Management module assists users in calibration, maintaining, organizing and managing information about the gages, including service intervals, GR&R dates, recall dates and general gage event history.

MeasurLink is available with floating/concurrent license options for multi-seat packages. This is a flexible, cost-effective option to include more users without purchasing additional seats.

All MeasurLink® 8 editions ship with a copy of Microsoft® SQL Server Express Edition 2014 SP 1 which can be used in standalone or workgroup installations. All MeasurLink® 8 editions are supported on the following Microsoft® Windows® Operating Systems versions: all Windows® 7 versions and all Windows® 8 versions. Both 32-bit and 64-bit operating systems are supported.

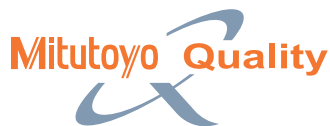

Mitutoyo is offering the following bundle to our customers so that they can take advantage of electronic data collection as they implement and use our software.

MeasurLink 8 Bundle Promotion

Small Tools with SPC Output	10% OFF
Data Management Hardware	10% OFF
5 to 30 Seat Workgroup/Site License	20% OFF

*Applies to Small Tools with SPC Output only. Applies to all Data Management Hardware including but not limited to: USB-ITN, U-Wave, Multiplexers and SPC Cables. Does not apply to individual MeasurLink seats or upgrades. Bundle must consist of at least 1 Small Tool with SPC Output, 1 Data Management Hardware unit and 1 MeasurLink Workgroup/Site License.

MeasurLink 8 performs at its best when used with Mitutoyo Small Tools and Mitutoyo Data Management Hardware.

Any combination of Small Tools with SPC output and Data Management Hardware will receive a 10% discount when purchased with a 5 to 30 Seat Workgroup/Site License. Any MeasurLink Workgroup/Site Licenses purchased as part of this bundle will receive a 20% discount! Any quantity of Small Tools and Cables can be purchased in this bundle so that you have all the gages you need to complete your MeasurLink project, large or small.
