

ISO 17025 Calibration

- Accredited to calibrate over 150 measurement parameters
- On-site calibration available for maximum uptime
- Ensure your measurement equipment is as accurate as possible
- Data you need to be “audit ready” available 24/7 via our award-winning GageSuite system

Pipettes	Temperature Measurement & Mapping
pH Meters	Temperature Controllers
Conductivity	Data Loggers
Lab & Analytical Balances	Pressure (DP, Gages, Controllers)
Moisture Balances	Test Stands
Spectrophotometers	Viscometers
Centrifuges	Wt./Gal Cups, Zahn Cups
Oven & Freezer Mapping	Gas Flow
Autoclaves	Analytical Equipment

24 Hour Repair and Technical Support

- Repair capabilities for a wide variety of gages and tools
- Highly trained technicians quickly identify the problem and begin repairs- minimizing downtime

Embedded Services

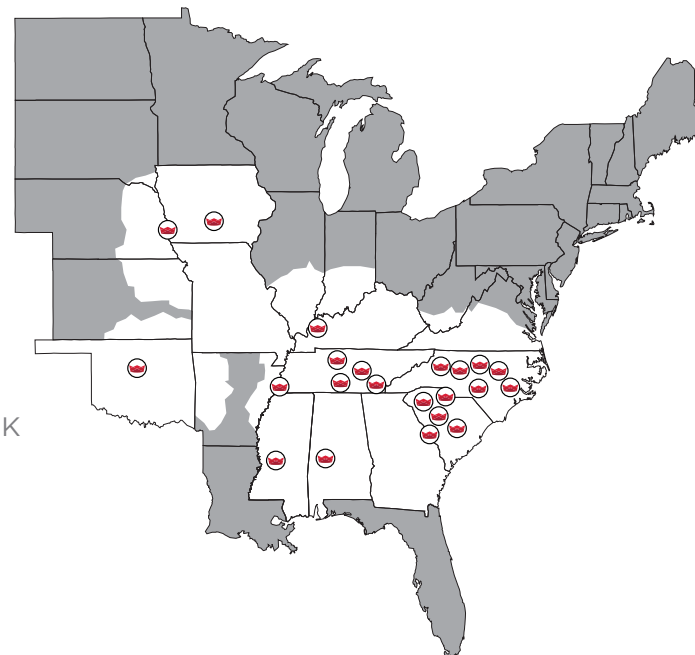

- Any of all of our services are available on a full-time, fully integrated basis at your facility

J.A. KING IS A THIRD GENERATION FAMILY BUSINESS FOUNDED IN 1939

Our guiding values have always been Character, Integrity & Professionalism. We strive to be our customers' valued choice for precision measurement by providing: **Quality Systems Integrity, Reduced Risk, and Best-In-Class Measurement Services.** Our team of 400+ members possess industry-leading expertise and take pride in providing exceptional customer service.

FULL SERVICE LOCATIONS

- Charlotte, NC
- Greenville, SC
- Nashville, TN
- Omaha, NE
- Raleigh, NC
- Columbia, SC
- Des Moines, IA
- Oklahoma City, OK
- Greensboro, NC
- Chattanooga, TN
- Paducah, KY
- Memphis, TN

LAB PRODUCTS AND SERVICES

J.A. King has over 75 years' experience helping our customers select the ideal piece of measurement equipment for their application. We also offer one of the broadest ISO 17025 accredited calibration scopes in the industry to ensure that your equipment is as accurate as possible. J.A. King can be your single source calibration provider- simplifying scheduling and reducing downtime.

SARTORIUS BALANCES

J.A. King is your expert when it comes to weighing. Our world-class team will help you select the ideal balance for your application and provide the ISO 17025 accredited calibration you need for compliance.

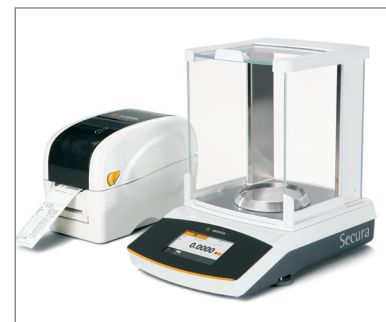

CUBIS

These premium laboratory balances are modular and can be fully customized to your application. You choose the display, weigh module specs., draft shield, and interface. Fully configured Cubis packages are also available for off-the-shelf delivery. Cubis comes with leveling ability, is printer and LIMS compatible, and configurable for SOPs.

SECURA

Precision balances provide secure and reliable results. Real-time guidance prompts for leveling, automatic internal adjustment, and minimal reference sample provide simple user guidance and traceability for efficient lab work flow. LIMS compatible, and configurable for SOPs.

ENTRIS

Entris balances provide the best value for your money without compromising precision and reliability. Dependability, simplicity, advanced weighing technology and German engineering are all part of the Entris series balances.

MOISTURE ANALYZERS

are important tools across industries. From foods, to fine chemicals, plastics to pharmaceuticals, accurate moisture analysis is a requirement.

SARTORIUS ELECTRONIC & MANUAL PIPETTES

PICUS®

Designed to revolutionize pipetting, it is the smallest and lightest electronic pipette on the market (100 g). This enables it to ease the user's workload and provides protection from repetitive strain injury (RSI). A unique plate tracker increases reliability in microwell plate work.

eLINE® ELECTRONIC PIPETTES

in the Biohit family have been providing high precision and comfort for years. eLINER reduces the need for several work stages and enables liquid dispensing twice as fast as a mechanical pipette.

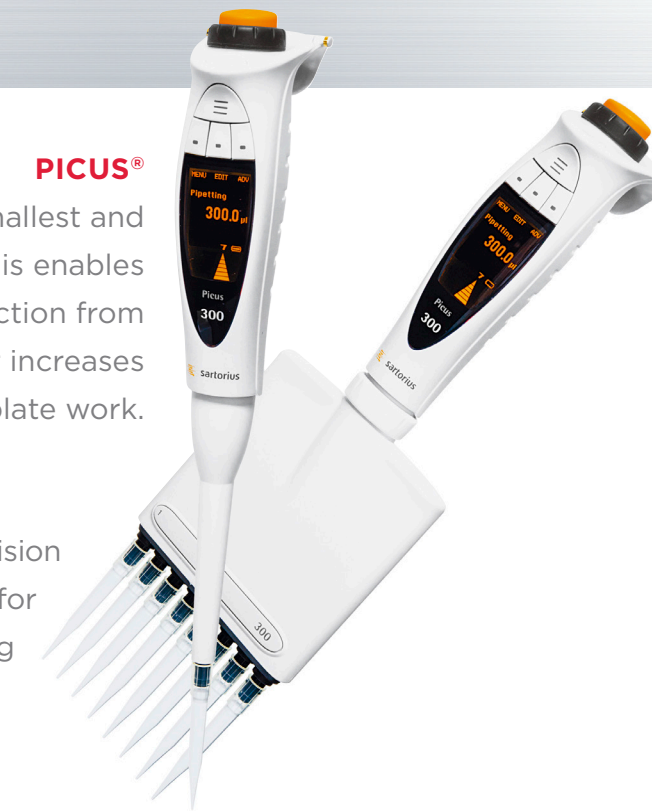

TACTA MECHANICAL PIPETTES

Tacta is a premium mechanical pipette featuring superb comfort and reliability. Designed with comfort in mind, Tacta makes pipetting effortless and safe, while producing accurate and reliable results time after time. Tacta features low pipetting and tip ejection forces that reduce the risk of Work Related Upper Limb Disorder (WRULD).

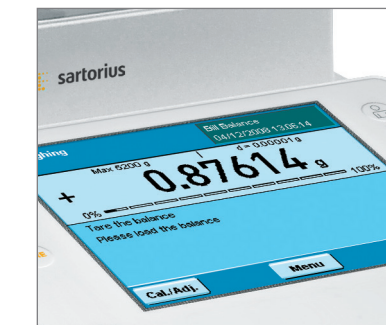

PIPETTE CALIBRATION SERVICES

Pipettes are an integral part of daily laboratory activities. Calibration drift and out of tolerance events are often invisible in pipetting but can have a substantial effect on results. Wear and tear on O-rings, residue on pistons, and barrier failures can all contribute to calibration and operation failure. Let J.A. King keep your daily pipetting in check and in compliance.

J.A. King offers on-site and mail-in ISO8655 compliant pipette calibration.

SARTORIUS LAB INSTRUMENTATION

CENTRISART CENTRIFUGES

are high performance, extremely compact, and very quiet. Benchtop models range from Micro-Centrifuge to High-speed up to 62,000 g with refrigerated options. J.A. King can help you select and calibrate your centrifuges.

ARIUM

These Lab Water Systems are customized for specific applications and needs. Type I, II, & III (RO) system options are available.

BIOLOGICAL AIR SAMPLERS

Sartorius' AirPort MD8 air sampler is flexible and efficient. It is compact and can be used in impaction mode or with gelatin membrane filters. J.A. King offers calibration of mass air samplers using our traceable flow rate measurement bench.
