

Giving you a **COMPETITIVE ADVANTAGE**  
while ensuring **COMPLIANCE** and **CONSUMER SAFETY**

J.A. King understands that your products must not only satisfy consumer expectations, but also meet strict industry, regulatory, quality and safety standards. We work with you to provide high-quality, consistent products that will give you the edge in a highly competitive environment.

## SERVICES

### ISO 17025 CALIBRATION

- One of the broadest scopes in the industry.
- Onsite calibration provides immediate turnaround for maximum uptime.
- Calibrations and data you need for regulatory compliance, so you can trust that your measurement equipment is as accurate as possible.
- Documentation you need to be “audit ready” at all times available via our award-winning GageSuite system.

### MEASUREMENT AND INSPECTION

- Provide the Gage R&R's required by your quality system.
- Inspect faulty parts and perform root cause analysis.
- First article inspections? PPAP? Capability studies? J.A. King is accredited to provide the data you need to gain control of your processes.

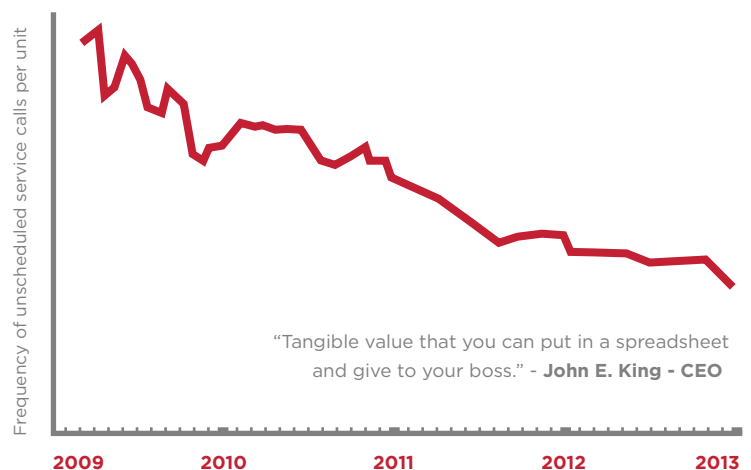

### 17025 ACCREDITED TESTING

- Destructive and Non-Destructive Testing
- Environmental Testing
- Product Testing
- Material Testing and more

### 24 HOUR TECHNICAL SUPPORT AND REPAIR

- Highly trained technicians quickly identify the problem and begin repairs, minimizing lost productivity due to downtime.
- Our customers realized a **46% reduction** in the number of unscheduled service calls over a 5 year period.

### TANGIBLE REDUCTION OF UNSCHEDULED SERVICE CALLS

J.A. King makes every effort to return our equipment to us with minimal turnaround time and the data we need to meet our regulatory requirements. - **CHARLIE WOLFE, TTI**

## ENGINEERING

- Our engineers design, build and implement an easy-to-use solution for your complex measurement applications.
- Process automation expertise enables you to reduce raw material consumption, improve production efficiency and achieve consistency in your products.
- Flexible solutions either completely from scratch or adapted from current hardware/software.
- Past projects include:
  - In-line weighing and labeling
  - Parts measurement and laser engraving
  - Automated batching for correct formulations
  - Custom fixtures

## PRODUCTS

- J.A. King can help you select the ideal product for your application. As a distributor of over 50 major measurement brands, we provide the equipment you need from product development to materials receiving and production.
- Our professional team installs your equipment and provides the necessary training, allowing you to confidently operate it from the start.
- Popular product offerings for the Consumer Products Industries include:
  - Force and Material Testing
  - Vision Systems
  - In-line Weighing Systems
