Award-Winning
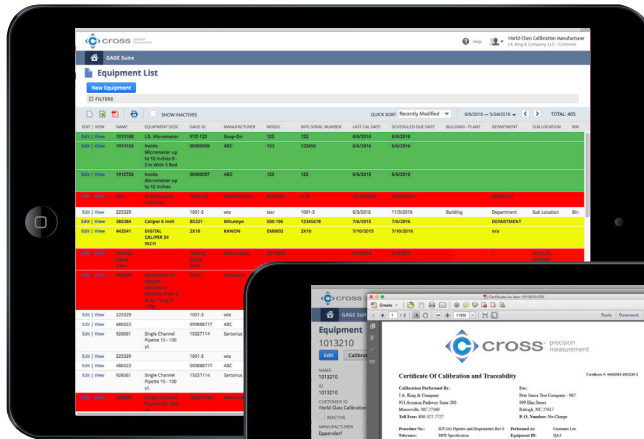

Cloud-Based

Comprehensive Reporting

21CFR11 COMPLIANT
Validated for accuracy, reliability and performance. Access limits with authorization hierarchy. Internal audit trail, change log, and device handshake enforcement.

Cross offers the most comprehensive, user-friendly equipment management system on the market - Gage Suite. This best-in-class system allows you to not only download and print certificates of calibration for your equipment, but provides you with complete asset management.

GageSuite provides instant access to the complete calibration history of each piece of equipment in real-time. Gone are the days of searching through a file cabinet to provide a calibration certificate, they are right at your fingertips! The system is color-coded by calibration due date to enable you to view the calibration status of your entire tool database. This leads to fewer missing tools which in turn lowers capital expenditures, provides less disruption, and more accountability.
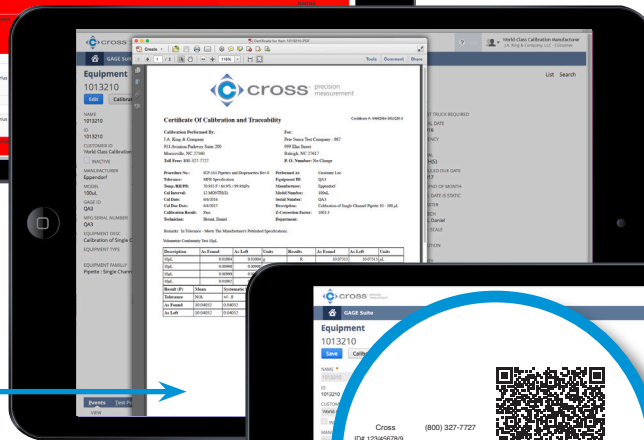

- **Comprehensive Reporting:** This color-coded visual management system allows you to see the status of your entire plant at a glance increasing the integrity of your quality system.

- **Complete Calibration and Repair History:** Instantly access the complete history of each piece of equipment, in real time- giving you the best audit performance.

- **Total Asset Management:** Location data for each piece of equipment helps reduce the number of lost tools and gages.

- **Award Winning Cloud-Based Tracking:** Available 24/7 in, with no IT support cost, no software installation, and best of all- it's free to all Cross customers!
