

# MOISTURE TESTING SOLUTIONS FOR THE PRODUCER

.....

## It All Starts Here...

.....

The GAC® 2500-UGMA is the U.S. federal and industry standard by which all moisture testers are measured.\*

The same expertise and technology used in our commercial instrument is now available for producers.

Look inside to compare our line of moisture testers to choose what's right for you.

*\*GIPSA-Certified as UGMA-Compatible*

**DICKEY-john**  
CORPORATION

## GAC<sup>®</sup> 2500-UGMA

### NTEP-CERTIFIED RESULTS

The DICKEY-john GAC 2500-UGMA Grain Analysis Computer is the next generation of moisture testers from the world-wide leader in grain moisture analyzers. In addition to being GIPSA-Certified as UGMA-Compatible, the GAC 2500-UGMA offers accurate and reliable features.

#### Benefits:

- Utilizes 149 MHz technology to provide NTEP certified results
- Improved mechanics provide shorter analysis time allowing more samples to be run, especially important during busy seasons
- Easy-to-use, intuitive color touchscreen eliminates operator training
- Optional pass-thru drawer minimizes real-life run time in grain operations
- Auto-run feature eliminates the need to touch the instrument during operation

## GAC<sup>®</sup> 2500-AGRI

### ON-FARM, ELEVATOR ACCURACY

Designed for large acreage farmers, the GAC 2500-AGRI Grain Analysis Computer uses the newest analysis technology to provide repeatable results, just like the instruments at the elevator. Additionally, the GAC 2500-AGRI has more accurate temperature sensing capabilities, allowing you to measure in extreme temperature conditions including frozen and hot grain.

#### Benefits:

- Utilizes 149 MHz technology to provide elevator-like results
- Easy-to-use, intuitive color touchscreen eliminates operator training
- Accurate temperature sensing capabilities allow you to measure frozen and hot grain
- Memory storage for up to 3,000 measurements

## GAC<sup>®</sup> 2100-AGRI / GAC<sup>®</sup> 2100B

### ACCURACY FOR SPECIALTY CROPS

The instrument of choice for niche markets, the GAC 2100-AGRI Grain Analysis Computer provides immediate moisture, temperature and test weight for peanuts, almonds, pistachios, walnuts and other specialty crops. The GAC 2100b is suitable for non-UGMA commercial applications.

#### Benefits:

- Self-loading and self-unloading
- Automatic weighing
- Automatic temperature correction
- Automatic bulk density compensation
- Used for over 450 grains and products including peanuts, almonds, pistachios, walnuts, and other specialty crops

## GAC® 500XT

### COMPACT, PORTABLE DESIGN

Analyze grain for moisture, temperature, and test weight in the field, at the bin or anywhere on the farm with this compact, cost-effective unit.

#### Benefits:

- Portable
- Printer compatibility
- Power source choices of 110/220 volt, or 12 volt car outlet
- Automatic temperature correction
- Automatic bulk density compensation
- Used for over 450 grains and products
- Stores up to 16 calibrations

## MINI GAC® / MINI GAC® PLUS

### AWARD-WINNING HANDHELD

Choose the mini GAC for highly accurate moisture testing or the mini GAC plus, the ONLY handheld moisture tester that measures accurate test weight.

#### Benefits:

- Easy and accurate
- NO screw cap, which can damage grains
- Menu-driven operating system
- An internal scale (no pre-weighing)
- Automatic temperature correction
- Test weight readout (mini GAC plus)
- Used for over 450 grains and products
- USB compatibility for calibration uploading

## M3G / M20P

### SCOOP, TEST AND GO

Weighing in at a little over a pound, this meter's rugged metal housing gives it better durability and provides years of trouble-free operation. Scoop a sample directly or catch seed as it flows from an auger then test immediately. It's just that simple.

#### Benefits:

- Fast and Easy
- NO screw cap, which can damage grains
- Affordable
- Sample averaging
- USB compatibility for calibration uploading

# MOISTURE TESTING SOLUTIONS FOR THE PRODUCER

DICKEY-john provides a variety of moisture testers to meet the demands of every user. Producers can choose from an economical, portable moisture tester to a larger unit that uses the same technology as the DICKEY-john commercial moisture testers used at grain elevators. When it all comes down to one number, be confident. Test with DICKEY-john.

## Backed by the power of DICKEY-john

When you buy a DICKEY-john product, you get dependability and reliability. DICKEY-john's advanced technology and superior electronics are backed by a team of expert in-house mechanical, electrical, software, and test engineers. DICKEY-john manufactures products to ensure total quality control. DICKEY-john is an ISO 9001:2008 certified facility.
