Are you confident that your plant is a safe place to work in?

Thursday, April 4th

8:30 am - 5:00pm

Cross Company

2001 Oaks Pkwy, Belmont, NC

Safety depends just as much on knowledge as it does on safeguarding hardware. If your team lacks a clear understanding of key safety concepts, even the most thoroughly safeguarded machines may still pose a risk.

Our intensive Machine Safeguarding Skill Builder on-site seminars teach the requirements, methods and practical application of machine and process safeguarding.

These intensive workshops cover:

- Applicable regulatory requirements
- Machine safety risk identification
- Tips for applying safeguarding concepts

Mark your calendars for our next workshop and gain the knowledge necessary to ensure that your facility is fully safe and compliant with all of the latest regulations!
