

ZSE Zero Backlash, Spring Engaged Shaft Brake

PATENTED

The Nexen Advantage

Continually testing and improving products as well as developing new technology, Nexen's contribution to the industry is now illustrated in the ZSE Zero-Backlash Through-Shaft Brake. With countless bore sizes available across the product family Nexen offers an off-the-shelf, zero-backlash braking solution for shaft holding applications. These spring-engaged, air released brakes eliminate the performance problems associated with electrical brakes for consistent, long lasting performance.

LOW INERTIA

One-piece hub/clamping-collar assembly lowers inertia and eliminates spline for zero backlash.

OPEN THROUGH BORE

Open ended design allows a wide range of shaft diameters to pass through the brake.

COOL OPERATION

Pneumatic disengagement adds no heat, providing cool operation and long life.

Standard electric brakes generate heat when disengaged, lowering the efficiency of the unit. The air-release design of the ZSE requires no energy for operation, resulting in higher, more consistent torque capabilities and lower energy costs.

SMOOTH TORQUE TRANSMISSION

Double-taper facing locks down on the housing and hub to create a solid zero-backlash torque transmission interface.

TRUE ZERO BACKLASH HOLDING

Unlike some competitors brakes, which use flexible leaf springs to transmit torque, the ZSE is zero-backlash up to 100% of it's rated holding torque. One piece, solid hub increases torsional rigidity.

ZERO BACKLASH COUPLING

The easy to install, split-hub shaft collar prevents backlash for smooth stopping and precision holding up to 100% of the max holding torque.

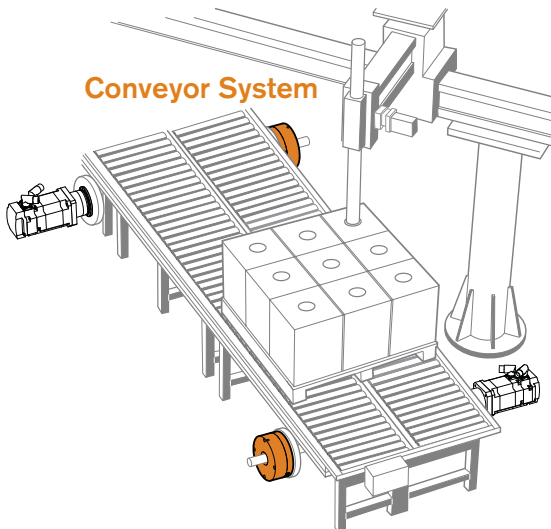

COMPACT HOUSING

The housing is compact in length and diameter, allowing the brake to fit onto short shafts and into small spaces.

Holding and E-Stop APPLICATIONS

Conveyor System

Positioning Indexer

Medical Equipment

Food Production

Automotive Parts

Renewable Energy

Semiconductors

Printing

Paper Converting

CONFIDENCE. INTELLIGENCE.

Industry 4.0 Solution

Nexen Smart ZSE Brakes (ZSE-S) are available with Industry 4.0 compatible smart internal sensors. These sensors detect the disengagement status and internal unit temperature to maximize machine efficiency and safety.

ENGAGEMENT/DISENGAGEMENT VERIFICATION

Having this information available aides with:

- Motor/Drive Programming
- Safe Machine/System Design
- Operational Feedback

INTERNAL TEMPERATURE OF UNIT

Having this information available aides with:

- Avoiding Overheat Conditions
- Maximizing Unit Life
- Maximizing Operating RPM

TRUE. ZERO. BACKLASH.

Nexen ZSE brakes are capable of zero-backlash holding up to 100% of rated torque. Some competitors "zero-backlash" brakes use a hub/rotor with a flexible leaf or diaphragm spring to transfer torque. As a result, some competitors brakes only achieve zero-backlash when utilizing as low as 10% of their full rated torque.

100% Rated Torque

ZSE Brake Cross-Sectional Drawing

ZSE Brake Approximate Dimensions

The following section contains the approximate dimensions for each size of Nexen's ZSE Brake. Always verify product information with the user manual and detailed product drawings when specifying a new brake into your application. Refer to www.nexengroup.com for user manuals, exact product dimensions and specifications.

¹ Dependent on unit bore size.

² As measured with the ZSE-S thermal sensor.

³ With quick exhaust valve.

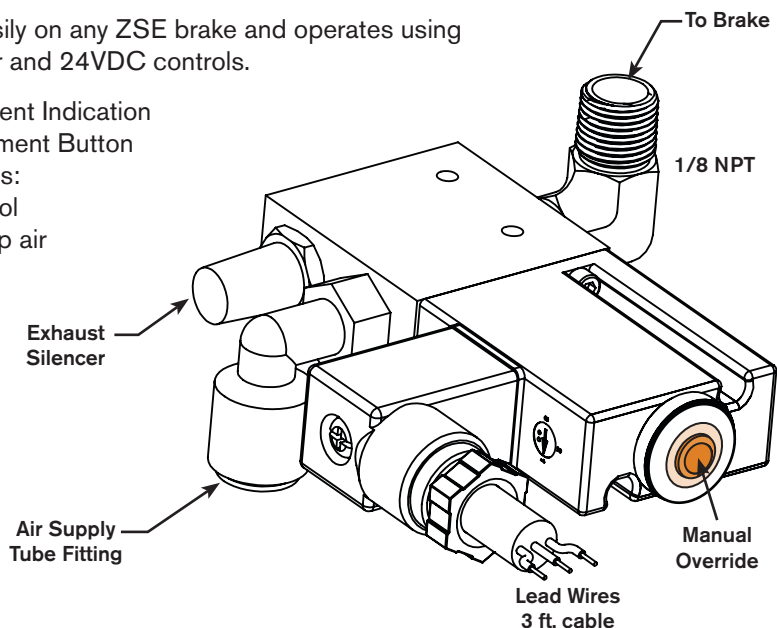

Optional Solenoid Valve

Nexen's optional solenoid valve offers machine operators additional safety and peace of mind by allowing users to see at a glance whether or not the brake is disengaged. The manual override button provides an easy option for manual brake disengagement.

Nexen's solenoid valve mounts easily on any ZSE brake and operates using standard 80 PSIG compressed air and 24VDC controls.

- Visual Disengagement Indication
- Manual Disengagement Button
- Simple Connections:
 - 24VDC control
 - 80 PSIG shop air

PRODUCT NUMBER: 964650

Optional Quick Exhaust Valve

Nexen's optional Quick Exhaust Valve offers machine operators additional safety through quicker, more consistent response times when brake engagement is called for.

Nexen's Quick Exhaust Valve mounts easily on any Nexen ZSE brake and operates using standard 80 PSIG compressed air.

ZSE Unit Size	Quick Exhaust Valve Part Number

Part# 945125

Smart ZSE (ZSE-S) Sensor Connections

Industry 4.0 Solution

Nexen Smart ZSE Brakes (ZSE-S) are available with Industry 4.0 compatible smart internal sensors. These sensors detect the disengagement status and internal unit temperature to maximize machine efficiency and safety.

ENGAGEMENT/DISENGAGEMENT VERIFICATION
Having this information available aides with:
<ul style="list-style-type: none"> • Motor/Drive Programming • Safe Machine/System Design • Operational Feedback

INTERNAL TEMPERATURE OF UNIT
Having this information available aides with:
<ul style="list-style-type: none"> • Avoiding Overheat Conditions • Maximizing Unit Life • Maximizing Operating RPM

Internal Temperature Sensor	
Sensor Type	Platinum RTD (Resistive Thermal Device)
Sensor Measurement	PT100 (DIN Standard)
Sensing Configuration	2, 3, 4 Wire Configurable
Connector	4 Pin M8 DIN

Disengagement Sensor	
Operating Principal	Inductive Proximity Sensor
Sensor Output	PNP Normally Open
Supply Voltage	10 to 30 VDC
Output Current	100 mA
Protection	Short-Circuit & Voltage Reversal Protection
Fieldbus Connectivity *	IO-Link v1.0
Connector	3 Pin M8 DIN

* If connected to an IO-Link sensor hub, IO-Link functionality is automatically enabled. If not using IO-Link, sensor defaults to standard PNP N.O. operation.
