

PALLY PRO BENEFITS

Pally is a URCap designed for a flexible, smooth and quick to install solution.

Full automation of palletizing and a great flexibility to handle changes in production. After the initial calibration, switch between various patterns without reprogramming the software. The included intuitive Pallet Builder allows you to easily create the desired pallet layout.

URCAP

- ✓ Fast setup
- ✓ User-friendly interface
- ✓ Increased speed and longevity of the robot through optimized path planning
- ✓ Up to 10/20 products per min (single/double grip)
- ✓ 1 or 2 pallets
- ✓ Any pallet size (EUR/US/custom size)
- ✓ Use the gripper of your choice
- ✓ Lifting column support
- ✓ Callbacks (insert your own UR-programs at certain events in Pally)

PALLET BUILDER

- ✓ Generate patterns quickly and without downtime
- ✓ Export patterns to the robot
- ✓ Flexibility to future changes in production
- ✓ Shim paper support
- ✓ Create interlocking layers
- ✓ Set label orientation (labels facing out)
- ✓ Different products per pallets
- ✓ Easily make changes

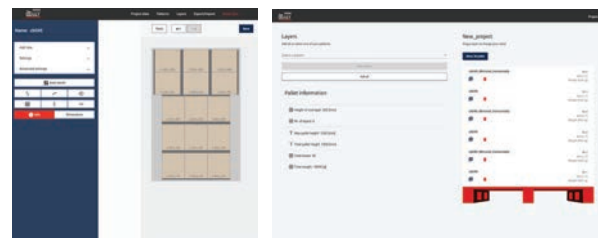

We put a great effort into making the setup easy. Our step by step calibration wizard is completed before you have emptied your cup of coffee!

PALLY URCAP

The intuitive and user-friendly Pallet Builder allows you to easily create the desired pallet layout, then export it by USB to the robot. No programming needed to change patterns!
