

See how Cross Company is helping our customers respond to the COVID-19 pandemic

Do You Need Quickly Deployable Labor for Machine Tending?

In today's tight labor market, it's increasingly difficult to find workers and keep them in repetitive, dull jobs. With a quick ROI period, this solution frees up these workers to do more complicated tasks that can't be done through automation. The Cross automation team has developed a [press brake tending](#) solution as well as a [CNC machine tending](#) solution that handshake directly with your equipment. Both are designed to operate the machine without constant manual operator interaction. To learn more about these and other Cross Automated Solutions, contact us today.

VIRALERT 3 is a cost-effective solution for taking temperature while maintaining social distancing. It is an IR temperature monitoring system coming in just under \$5,000.

- Indoor / Outdoor use: 50 - 120 degrees F
- Accuracy +/- .9 F (still blackbody calibration device)
- One person at a time. Fixed distance of 3 ft away from camera (in line with [FDA guidelines](#))

Hit the "Easy Button" with a Cross Robotic End Effector Control Kit

The Cross turn-key end effector control kit included everything you need to ensure that your application with one gripper or one vacuum generator works properly -- except the end effector fittings. In addition, the kit is designed to prevent your load from being dropped or released in the event you experience power failure.

Our team is here to discuss your specific application and determine if this kit is right for you. Click below to learn more or contact us today.

Does Updating Your Obsolete Equipment Seem too Daunting?

We realize that knowing the correct replacement for your obsolete equipment may be tough. As your equipment nears the end of its useful life nothing is more frustrating than realizing the part you need is no longer available. When this happens you don't have time to research which replacement part is right, that's why our team of automation experts are here to help. We can help you to spec the right replacement and even kit the parts for you to make installation a breeze. Check out [this example](#) of how our team helped move a 300 plus axis project from Yaskawa Sigma-II to Sigma-7.

If you are ready to start replacing your obsolete parts, contact our team today.
