The Ewellix Lift Kit Extends the Reach of Your Palletizing Robot System

UR robots are great for palletizing! Unfortunately, they do not always have the reach needed for larger palletizing applications. [EWELLIX](#) has solved this problem with their Certified UR+ LIFTKIT. This vertical axis designed specifically for collaborative robots is easy to assemble and gives your UR extended reach.

By raising and lowering your UR during the palletizing process, the arm is always at an optimal position for lifting and placing boxes. Utilized in the [Cross Palletron 3000](#), this increased range helps to both increase productivity and reduce costs.

Top Five Reasons Cobots are Great for Adapting to our "New Normal"

It's an understatement to say that things have changed since the start of the COVID-19 pandemic. For many of us, almost everything about our daily lives has changed in an effort to adapt and continue operations while keeping our teams safe. As you move into what we are now referring to as our "new normal" cobots can be a great tool for preserving efficiency while promoting safety. Here are the top five reasons why cobots are an excellent tool.

Read the five reasons and call a Cross robotic expert to discuss your upcoming application.

Single Pair Ethernet (SPE) Technology Livestream is this Week

SPE is the new network infrastructure for industrial IoT. Would you like to learn about how SPE can help you?

On September 22 and 23, our supplier partner [Phoenix Contact](#) will help host the SPE System Alliance digital exchange of knowledge between experts of different industries and technology sectors on the topic of Single Pair Ethernet. The Technology Days will provide participants with the opportunity to talk to specialists and to inform themselves about the added value of this SPE communication technology. A keynote, discussions, and an exhibition constitute the framework of this digital conference. Partners of the SPE System Alliance, like Dätwyler, Fluke Networks, Kyland, Microchip, [Phoenix Contact](#), Prysmian Group, R&M, Rosenberger, Sick, Telegärtner and Weidmüller, will present trends within SPE technology and explain the relevance for components like switches, semiconductors, sensors, connectors, and cables.

The program will take place at different times on both days so that everyone around the world who is interested in Single Pair Ethernet can participate. The live conference agenda on **September 23rd will begin at 8:00 AM (EDT)**. All presentations are in English, and the recordings will be available to download. Learn more about [Single Pair Ethernet](#) and the [SPE System Alliance](#).

[Contact a Cross technical specialist](#) today to find out more about SPE and IIoT.
