

See how Cross Company is helping our customers respond to the COVID-19 pandemic

## Make the Most of Your Downtime

We know that things may be a little slower than normal. A great way to use this time is to perform preventative maintenance you've been putting off. Maybe you have some older equipment that could benefit from some TLC. Updating and/or retrofitting the hose and fittings can both improve operation and extend the life of your machine. Additionally, if you have broken equipment collecting dust, taking the time to get it up and running again can save money down the road that would have been spent replacing it. Taking care of these tasks now can ensure you are ready to go when business picks up again! Come see us for your replacement hose and fittings, our team of experts is here to help you build even the most obscure assemblies.

## We Have the Parts You Need

When equipment breaks you don't have time to visit multiple stores looking for the hose and fittings needed. Cross stores boast a large inventory and receive consistent replenishment from our suppliers who are based in the US. We focus on keeping the parts you need in stock, so you can focus on getting the job done!
