QuickFit™ Oil Change System

Faster, Cleaner and Safer Oil Changes

Parker's QuickFit Oil Change System makes oil changes for engines and machinery a faster, cleaner, and safer process. Routine maintenance oil changes can bring a multitude of challenges:

- Cramped engine compartments make access difficult and can lead to safety and ergonomic risks for workers
- Multiple access points can result in cross-contamination
- Removing a filter full of oil can be difficult, leading to spills, environmental contamination, and cleanliness issues
- Each piece of equipment is different and may require a unique set of instructions and specialized training

The QuickFit system provides an accessible, single point connection that allows oil extraction directly into the final waste containment.

The same connection point is then used to refill the system with new oil. This reduces the total number of steps in the oil change process and eliminates any risk of safety hazards or spills.

Contact a [Cross Hose & Fittings](#) specialist to discuss the advantages of a Parker QuickFit™ oil change system!

Need a Crimper On-Site?

Now that we're all social distancing for the foreseeable future, would you be interested in renting or purchasing a hose crimping system from Cross Hose & Fittings? Eliminate the need of making a trip to our hose store and simply set up a crimper on-site to take care of your immediate hose assembly needs. We even have a [quick video tutorial](#) to walk you through the process!

Contact a Cross Hose expert today to discuss how to get your crimper today.

Meet our Winston-Salem guy, Joe Mainello!

During the past few months, when we couldn't see our customers face to face as much, we asked our territory sales managers to record an elevator pitch about their branch. Here's our Winston-Salem TSM, Joe Mainello.

Joe has been with Cross Company for 20+ years and has 30 years experience in our industry.
