Do You Know What to Look for in a Fever Screening System?

As we all get back to the “new normal” many are faced with the dilemma of how to ensure the safety of their employees and patrons. Whether you operate a large manufacturing facility, a hospital, a municipal building, an airport, or even a shopping center, you may be looking for ways to stop infected individuals from entering your building. One way to add a layer of security is to check the temperature of everyone as they enter the facility. There are, however, a number of options on the market and you may not be sure which is best for you. To help, we have put together some of the key considerations to look at when shopping for a fever screening system.
