

CROSS CORPORATE OVERVIEW

Cross Company is a 100% employee-owned industrial solutions company that is innovating the industrial world, one customer at a time. We apply technologies and services that help our customers to increase efficiency, reduce risk and improve quality.

Cross is located all over the eastern United States and has been applying our expertise to help manufacturers in every industry for over sixty years. We divide ourselves into five operating groups, each with a unique specialization. This means you get a full range of products and services within Cross, as well as in-depth, technical expertise within our groups.

■ Automation

- Fully integrated, custom automation solutions using robotics, pneumatics and electro-mechanical hardware, software and controllers
- Precision and electro-mechanical motion control solutions for OEMs and end users
- Custom measurement and test machines, including fixtures
- Standard, already designed automation solutions: machine tending, palletizing, airflow monitoring and more

■ Mobile Systems Integration (MSI)

- Machine electrification services including design and component specification for full electric and hybrid electric machines
- Electronic control system development including system architecture, component selection and software development
- Complete hydraulic system design and component specification services including full production kitting capabilities
- Mobile IoT services including gateway integration, data visualization, and data analysis and predictive analytics

855.778.2795

■ Process Solutions

- Control Systems Integration including turnkey control solutions, system design, upgrades, migrations, optimization and virtualization
- On-Site and remote engineering services for control systems, PLC, HMI, SCADA
- Process Instrumentation for flow, level, pressure and temperature measurement
- Instrument start-up, commissioning and calibration
- Gas detection and analytical devices
- Process valves, control valves, valve automation and valve repair services
- UL508A panel shop
- Relief valve, vent and regulator repair and testing
- Valve Automation Center

■ Precision Measurement and Testing

- 17025-accredited calibration of measurement equipment and gages
- Scale and weighing solutions
- Precision optical/vision measurement systems
- Dimensional measurement hand tools, gages and equipment
- Repair of scales & metrology equipment
- Data collection, analysis and predictive maintenance notifications for maintenance, calibration, regular service and/or replenishment
- Environmental, reliability and material testing
- Custom test machines for use in process, on the plant floor or in-lab
- QA/QC audit, data collection and analysis
- Product, first article and PPAP inspection measurement and metrology services, either onsite or in-lab
