precision measurement

**Scale Equipment** Cross's Sales Team takes pride in helping customers select the ideal products for their measurement applications. Measurement technology and quality requirements are constantly changing. We understand the measurement equipment you purchase must meet accuracy, durability, throughput, operator interface, and data output requirements.

With over eighty years of experience, our sales team takes pride in their ability to understand your needs and apply the best solution every time. We have metrology specialists across the Southeast and Midwest, as well as a dedicated inside sales staff, to assist you in purchasing the best equipment for your application, regardless of brand.
