

STÖBER

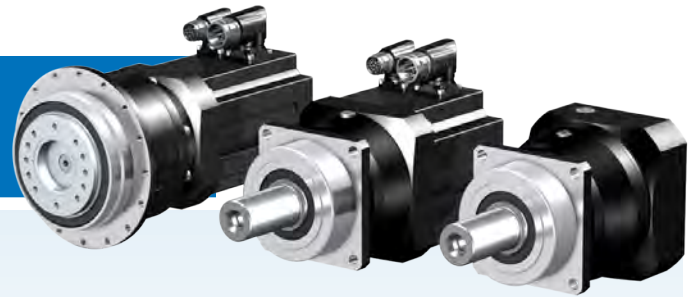

UPGRADE TO **GENERATION 3** PLANETARY GEAR UNITS

THE NEXT REVOLUTION IN PLANETARY TECHNOLOGY

Our design engineers have been working tirelessly to bring you the latest in technology. Get your new Generation 3 Planetary beginning February 2021.

**GENERATION 3 NOW
HAS NEW DESIGN!**

TOP ADVANTAGES

- **Save Space** - Pair with a geared motor for the shortest length on the market!
- **Improved machine performance** - Increase torque ratings by up to 67%, higher input speeds up to 45%, and higher stiffness up to 50%
- **Breadth of knowledge and product at your disposal** - STÖBER has superior application support and can build and ship in one day
- **More than a gearbox** - Add a geared motor or rack and pinion to complete your solution
- **New Options** - Reinforced bearing option for our PH series, which can increase axial shaft load capacity up to 35% and radial load capacity up to 40%. MSS1 seal for our P series, which can increase your gearbox's life!

Integrated safety brake, ATEX Certified, and Food Duty Packages are all still available.

HERE TO HELP

Don't worry - our team will provide continuous support as you make the transition from Generation 2 to Generation 3. We are available 24/7, 365 days a year, so don't hesitate to contact us for assistance.

ADDITIONAL INFORMATION

- Delivery times for Generation 3 units are the same great lead times as Generation 2, ONE BUSINESS DAY!
- Part number will change
- Generation 2 planetary will be supported for 1 year
