

Energy Industry Products, Services, and Solutions

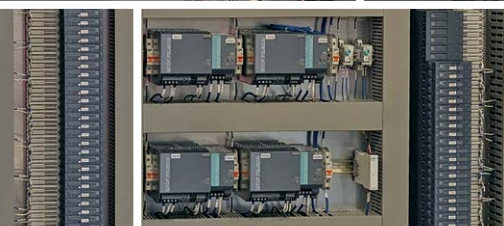

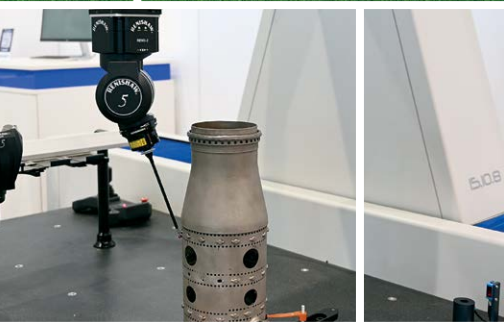

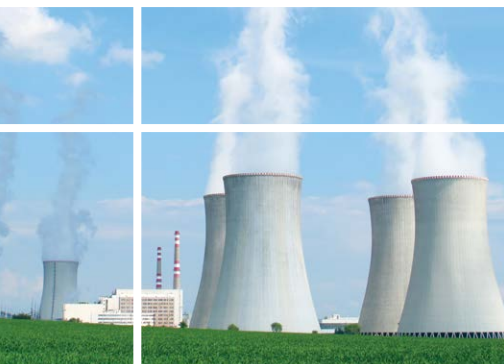

Cross Company offers comprehensive products, services, and solutions that enable companies in the energy sector to achieve safety, efficiency, reliability, and flexibility. In addition, those in the energy sector deal with a number of regulatory entities including NRC, DoE, and API. Our team has experience helping customers make sure they stay in compliance. Whether you manufacture drilling equipment or wind turbine blades or operate a refinery or power generation plant- we have a solution to meet your needs. For process control, we can help you control, monitor, analyze and safely operate your plant. High-quality products, backed by our service and repair group, ensure you're up and running efficiently. Cross Company also offers extensive ISO-17025 accredited calibration services, either at your location or in our lab. The experts at Cross are here with the products, services, and solutions you need.

Providing Tangible Value

- **Reduce your risk** by using the latest in process safety equipment, gas monitoring devices, and pressure/vacuum relief valves
- **Increase the efficiency** of your process with accurate and reliable monitoring and measuring equipment including temperature, level, flow, and more
- **Improve your plant efficiency** by upgrading to the latest control system technology.
- **Stay compliant:** Regulations are always changing. Make sure you can measure and document every part of your process to comply with the latest legislation.

Products:

- DCS, SCADA, and PLC hardware and software
- Vessel weighing
- Checkweighers
- Industrial floor scales
- Truck & rail scales
- Dimensional metrology equipment
- Flow measurement
- Valves and valve automation
- Pressure management
- Process Instrumentation
- UL508A control panel design & build
- Gas detection
- Proportional control products
- Industrial & hydraulic hose
- Hose fittings, couplings, and connectors
- Transair aluminum piping
- Process analyzers for plant emission monitoring

Services:

- Equipment start-up and commissioning
- Flow meter start-up and commissioning
- Control engineering service contracts
- Process troubleshooting
- Valve and vent repair
- ISO 17025 accredited calibration services
- Measurement equipment repair and maintenance
- Pre-loaded PLCs and drives
- Obsolescence and retrofit assistance
- Custom hose fabrication
- Hose repair
- Incoming parts inspection
- Third-party inspection
- Environmental testing
- Materials testing
- After hours scale repair

Solutions:

- Control system integration
- Control system upgrades
- Legacy system migration
