

E2S SERIES ISOLATION VALVES

The E2S series valve combines the versatility of Clippard's compact 10 mm valve line with the advantages of media isolation. With a durable, glass-filled nylon body and an EPDM diaphragm that separates the actuation mechanism from the flow path, the E2S series is an excellent choice for dispensing a wide range of aggressive gases and liquids in applications that require compact, electronically-controlled valves. Applications include printing equipment, medical diagnostic devices, dental equipment, fermentation, water treatment, spraying applications, and more.
