

Cross Automated Solutions

Cross Automation delivered our first integration solution in 1958 and our team has **decades of experience** developing solutions using robotic automation, electromechanical motion control, pneumatics, vision, and precision measurement equipment.

We love helping customers like you **improve efficiency, reduce risk** of injury, and **improve the quality** of your product by automating repetitive tasks. Whether you are dealing with staffing shortages, quality and consistency issues, or simply want to utilize your human labor elsewhere in your facility, automation is a great solution.

Our team specializes in:

- Palletizing
- Pick and place applications
- Machine tending
- Case packing
- Vision-based inspection
- Weight based automation
- Custom measurement solutions
- Custom test machines
- Specialty gaging and fixturing
- Custom End of Arm Tooling
- Polishing and deburring
- Batching and blending
- SPC, data collection, monitoring, and trend analysis

Don't see what you are looking for? Ask us about your specific application needs.

Cross adds tangible value

- **Reduce the risk** of on-the-job injury by automating potentially dangerous jobs
- **Improve efficiency** by implementing robotic solutions that run consistently at greater speed than a human operator.
- **Raise the quality** of your product by improving repeatability and consistency.
- **Reduce the risk** of turnover by utilizing human operators in more desirable tasks

Why work with Cross?

We are manufacturing automation experts partnering with you to develop innovative solutions backed by world-class customer service. Cross provides fully custom solutions to fit your needs. Our team doesn't just try to fit our product to your problem. Instead, we work with you to fully understand your specific needs, identify the ROI, and develop a turnkey solution to meet your requirements.

- **Speed:** We know when you come to us, you have a pain point and need it to be solved as quickly as possible. Our team works diligently to provide you quotes, concepts, installation and training on time and on budget.
- **Technical Ability:** We have a team of experienced engineers working on every project. You can rest assured knowing that we have the technical know-how needed to build a quality solution and ensure it meets your requirements through factory acceptance testing and site acceptance testing.
- **Customer Service:** Our team has decades of automation and measurement expertise. We walk hand-in-hand with our customers to ensure your automation project is as seamless as possible. This includes training your team before installation as well as detailed documentation and training manuals. We are here to support you after installation with service packages, IoT support, and data collection options for predictive maintenance.
