

COMPLETE HOSE AND FITTINGS SOLUTIONS FOR THE RECYCLED MATERIALS INDUSTRY **PRODUCTS**

If your machines aren't running,
you're not making money.
We stock the high pressure,
harsh environment hoses
you need and all the
necessary connectors to get you
back up and running fast.

- Rugged 4-wire and 6-wire hoses designed to withstand the most severe duty, high pressure and high shock environments
- Metric fittings and adapters
- Hydraulic quick disconnects including connect under pressure couplings
- Parker hose shield products to extend the life of your hose
- O-rings: Code 61 and Code 62 flanges and adapters
- High tech, absorbent spill mats, pads, rolls, socks, pillows, pans, and spill kits
- Thermoplastic over-the-sheave hose for forklift trucks

**Cross Hose & Fittings has what you need
to get your machines back up and running fast!**

SERVICES

Our certified connector specialists are highly experienced and able to quickly identify your threads in order to make a replacement hose assembly. They are factory-trained and only use quality components in their assemblies. Our large selection of in-stock parts allows us to get your hose made on the spot so you can get back to work.

CROSS ADDS TANGIBLE VALUE FOR YOU

Reduce Risk: Feel confident that your hose assemblies are made properly so they don't fail prematurely, endangering you or your team.

Improve Efficiency: Don't waste time running all over town to get your hose replacements. We have a large selection of hoses and connectors and the know-how to get you back up and running quickly.

Raise Quality: We only sell the highest quality parts and never mix parts from different manufacturers. You can be sure the assemblies going on your machines are high quality and tough enough for the scrap & recycling environment.
